

Description: The Psychology & Behavioral Sciences Collection contains more than 480 journals covering a broad range of subjects in the fields of psychology, behavioral sciences and related disciplines.

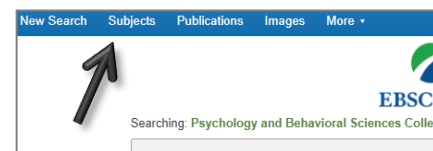

Topics Include: anthropology, emotional & behavioral characteristics, mental processes, observational & experimental methods, and psychiatry & psychology

Note: See the EBSCOhost Interface handout for additional information.

Examples: The following are examples of the types of questions that can be answered using the Psychology & Behavioral Sciences Collection database.

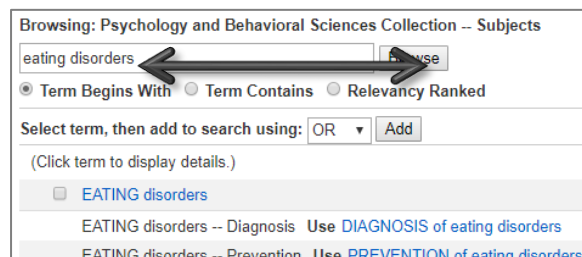

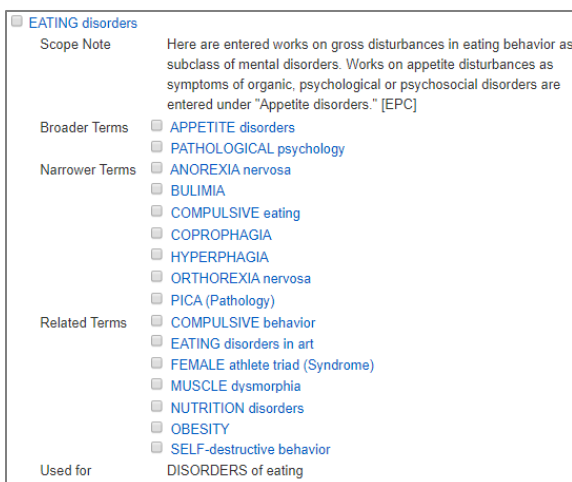

- ◆ The school counselor is working on an advanced degree. As part of the degree, they are writing a paper about bullies in school and need research material. Here are examples of searches that can be used to find relevant results.
 - school bullying
 - prevention of school bullying
 - cyberbullying
 - school violence
 - harassment in schools
- ◆ A student wants to write a paper about some aspect of eating disorders. They will need to narrow the topic down but would like to see what information is available before doing so.

1. One way to explore a topic is to use the **Subjects** search.
2. Enter the term eating disorders in the **Browsing** box.

For this example, I'd suggest performing this search twice. Once with **Term Begins With** selected and once with **Term Contains** selected. Click **Browse**.

3. A list of subjects is displayed.

4. Click on a term to see more information including Broader Terms, Narrower Terms and Related Terms.
5. To search for a specific subject click the corresponding check box then click **Add**.
6. The subject will now appear in the search box at the top of the screen. The DE signifies that the search phrase is a subject heading. Click **Search** to run the search.

7. If needed, return to the Subject screen to explore additional subjects.
